

# PERIMETER BARRIERS

*Italian Engineering*

**Catalogue 2015**

# MITECH<sup>®</sup> SECURED BY INNOVATION

Mitech<sup>®</sup> manufactures a complete range of intrusion perimeter barriers of utmost reliability and high quality, Made in Italy, for civil building, industry and the protection of sensitive areas.

The Company has been constantly investing in research and development thus applying innovative technologies engineered for a congenial and easy perimeter set-up ensuring the maximum protection for a worry-free environment.

Mitech<sup>®</sup>, owing to a direct management intervention and exhaustive product documentation, differs by paying particular attention to support activities to its customers in the configuration analysis design phase and after-sales service.

Today Mitech<sup>®</sup> relies on a consolidated distribution network throughout the domestic market. Over the recent years it is expanding rapidly in many foreign countries by means of solid partnerships undertaken with qualified security distributors and well-reputed system integrators firms.

Maurizio Fantoni

# GARDEN and TOWER MAGNUS

## DUAL IR+MW TECHNOLOGY COLUMNS

Also available in bidirectional version **MAGNUS PLUS**

**GARDEN** and **TOWER MAGNUS** are the new dual technology perimeter columns with utmost reliability and efficacy.

The **GARDEN** version is camouflaged as a lamp post that combines aesthetics with functionality to a reliable security device. It is pre-cabled and ready for installation, composed of a transmitting and a receiving unit.

The transmitter emits a codified sequence of infrared beams and high frequency electromagnetic waves directed to the respective receiver.

The microwave device uses planar antennas of new generation and military derivation with reduced size owing to the absence of the cumbersome parabolic antenna.

**MAGNUS PLUS** is the bidirectional version with a column of 14 cm containing built-in transmitting and receiving devices enabling a 90° angle.

**GARDEN** and **TOWER MAGNUS** are also indicated for harsher environments and weather situations (low temperatures, fog, humidity, gusts of winds) thanks to the built-in automatic temperature control device and the disqualification system and sturdy aluminium structure.

### FEATURES AND SOLUTIONS FOR INSTALLATION

Garden Magnus

Tower Magnus

- Maximum range 100 m
- Double lens
- Planar antenna lobe height 2,5 m – lobe opening 1,0 m
- Operating frequency 24.000:24.250 GHz (250 channels)
- Point-to-point easy alignment
- Pre-cabled, ready for installation
- Built-in automatic temperature control device
- Integrated disqualification (fog function)
- Optical synchronization
- Independent MW and IR programmable in AND/OR function on control panel
- Aluminium structure and polycarbonate cover
- Column diameter 14 cm (available heights from 1,5 m to 3,0 m)
- Serial communication RS485
- Protection class **IP65**

# GARDEN and TOWER IR

## ACTIVE INFRARED COLUMNS

Available in terminal and bidirectional version

**GARDEN** and **TOWER IR** are the perimeter columns with crossed beams and double lens.

The **GARDEN** version is camouflaged as a lamp post that combines aesthetics with functionality to a reliable security device.

Both pre-cabled and ready for installation they are composed of a transmitting and a receiving unit. The transmitter emits a coded sequence of infrared beams which are detected by all the receivers. The columns do not require any wire synchronism because each beam is recognized by means of differentiated optical codes (optical synchronization).

**GARDEN** and **TOWER IR** are more suitable for harsher environments and weather situations (low temperatures, fog, humidity, gusts of winds) thanks to the built-in automatic temperature control device, the disqualification system and sturdy aluminium structure.

# GARDEN and TOWER MICRO

## MICROWAVE COLUMNS

Available in terminal and bidirectional version

**GARDEN** and **TOWER MICRO** are the microwave perimeter columns.

The GARDEN version is camouflaged as a lamp post that combines aesthetics with functionality to a reliable security device.

Both pre-cabled and ready for installation they are composed of a transmitting and a receiving unit. The transmitter emits high frequency electromagnetic waves directed to the respective receiver. The microwave device uses planar antennas of new generation and military derivation with reduced dimensions owing to the absence of the cumbersome parabolic antenna.

**GARDEN** and **TOWER MICRO** are more suitable for harsher environments and weather situations (low temperatures, fog, humidity, gusts of winds) thanks to the built-in automatic temperature control device, the disqualification system and sturdy aluminium structure.

# FOSTER

## ACTIVE INFRARED BARRIER WITH DOUBLE LENS

Also available in single lens

**FOSTER** is a perimeter IR barrier with crossed beams for protection of external areas, with a pleasant design and compact dimensions.

Pre-cabled and ready for installation **FOSTER** is composed of a transmitting and a receiving unit. The transmitter emits a coded sequence of infrared beams which are detected by all the receivers. Due to its innovative features and sophisticated technological content, it belongs to the top-end product range but it is offered at really unrivalled price/quality ratio.

Available in different versions and heights, it can be installed on a pole or wall and used in combination with columns TOWER and GARDEN IR.

**FOSTER**, standard equipped with automatic temperature control device, disqualification system and sturdy aluminium structure, is synonymous with security and reliability.

### FEATURES AND SOLUTIONS FOR INSTALLATION

DOUBLE LENS

Maximum range 100 m

SINGLE LENS

Maximum range 70 m

- Maximum range 100 m (double lens version)
- Maximum range 70 m (single lens version)
- AND/OR programming
- Point-to-point easy alignment
- Pre-cabled, ready for installation
- Built-in automatic temperature control device
- Integrated disqualification device
- Optical synchronization
- Aluminium structure and polycarbonate cover
- Available heights from 1,5 m to 3,0 m
- Protection class **IP65**

Solution with pole fixing 1

Solution with pole fixing 2

Solution with wall fixing

# WINNER

## WIRE ACTIVE INFRARED BARRIER

Also available in white

**WINNER** is a dual led IR barrier with parallel beams.

It consists of two symmetrical profiles to be installed on either side of the entrances to be protected and it allows to anticipate intrusion by leaving freedom to move indoors with even windows and doors open.

Thanks to its compact dimensions it can be easily installed in small spaces including the interspaces between doors and windows, rolling blinds and shutters.

**WINNER** guarantees an excellent reliability standard, high immunity to sunlight and insects. It is sturdy, easy to be installed, available in white and black colours and it has a maximum range of 15 meters.

### FEATURES AND SOLUTIONS FOR INSTALLATION

Black  
Maximum range 15 m

White  
Maximum range 3,5 m

- Maximum range 15 m (black version)
- Maximum range 3,5 m (white version)
- Double led – AND/OR programming
- Available heights from 0,5 m to 3,0 m
- Wire synchronism connection
- Beams adjustable within the profile and expandable up to 10
- Aluminium structure and polycarbonate cover
- Customized profile sizes available on request
- Protection class **IP54**

### ACCESSORIES

**WIN TW**  
Turning articulation

# TRENDY<sub>plus</sub>

## SELF-POWERED ACTIVE INFRARED BARRIER Compatible with any radio transmitter

**TRENDY<sub>plus</sub>** is a wireless, self-powered miniature IR barrier with double led and 24-month autonomy, which is compatible with any radio transmitter.

It consists of two symmetrical profiles to be installed on either side of the entrances to be protected and it allows to anticipate intrusion by leaving freedom to move indoors with even windows and doors open.

Thanks to its compact dimensions it can be easily installed in small spaces including the interspaces between doors and windows, rolling blinds and shutters.

**TRENDY<sub>plus</sub>** has a maximum range of 5 meters and it is available in different versions up to a maximum of 7 beams.

### FEATURES AND SOLUTIONS FOR INSTALLATION

- Compatible with any radio transmitter
- Lithium battery autonomy of 2 years
- Maximum range of 5 m
- Double led - AND/OR programming
- Available heights from 0,5 m to 3,0 m
- Optical synchronism
- Beams adjustable within the profile and expandable up to 7
- Aluminium structure and polycarbonate cover
- Customized profile sizes available by request
- Protection class **IP54**

### ACCESSORIES

**WIN TW**  
Turning articulation

# TWIN and TWIN WS

## DOUBLE PIR CURTAIN SENSOR

with antimask

**TWIN** e **TWIN WS** are the new dual passive infrared sensors for doors and windows. Weather resistant, they have small dimensions which make them suitable for protection of well-defined and restricted areas. They have a maximum range of 4 metres and are available in white and brown colours.

**TWIN WS is self-powered version by lithium batteries, compatible with any radio transmitter.**

### Features

- Maximum range 4 m
- Horizontal detection angle 35°
- Operating temperature from -20°C up to +50°C (humidity 85%)
- Antimask
- AND/OR programming
- Number of pulses 1 or 2 pulses in 2,5 s
- ON/OFF led selector
- Temperature automatic compensation
- 4 detection areas
- Tropicalized board
- TWIN dimensions 190 x 30 x 26 mm
- TWIN WS dimensions 280 x 38 x 30 mm

# SMART

## DOUBLE TECHNOLOGY CURTAIN SENSOR

**SMART** is a double technology sensor for doors and windows. Particularly weather-resistant, it has reduced sizes, which makes it suitable for protection of well-defined and restricted areas.

**SMART** creates an ultra-reduced curtain barrier of approximately 7.5 degrees and it has an adjustable range of up to 2 metres. Available in white and brown colours. Corner wall mounting bracket included.

IP54

### Features

- Maximum range 12 meters
- Immune to white light
- Vertical detection angle 80°, horizontal angle 7,5°
- Anti-collision
- Active IR antimask
- 24 GHz microwave
- Tropicalized board
- Immunity up to 2 Ghz
- Sensor dimensions 115x40x45 mm

# RELLOS

## PASSIVE INFRARED CURTAIN SENSOR

**RELLOS** is a curtain sensor for doors and windows. The reduced sizes and the ability to self compensate any sudden change in temperature automatically make it suitable also in critical circumstances.

**RELLOS** creates a curtain barrier of approximately 7 degrees, it has a maximum range of 8 metres and is available in white and brown colours.

IP54

### Features

- Maximum range 8 metres
- Detection angle 60° vertical, 7° horizontal
- Immunity up to 2 GHz
- Immune to white light
- Sensor dimensions: 95x28x35 mm

# MINI GSM

## ULTRA-COMPACT MODULE

**MINI** is the ultra-compact module (6x3 cm) designed to create a perimeter protection independent of conventional alarm systems. **MINI** has very high and innovative performances, it has extremely reduced sizes and it can be programmed via USB or bluetooth.

### Accessories

**USB KIT**  
Programming USB kit

**AD BLUE**  
Programming Bluetooth

**GSM RI**  
Relay for OC output

### Features

- Operating via SMS
- Two inputs
- Open connector output 300mA controlled by Caller-ID
- Text and voice messages for alarm and system status
- Contact ID, jammer alarm

### Applications

- Perimeter barriers
- Free opening of gates and garages doors via caller ID recognition
- Control of household appliances, air conditioning, heating, lighting, garden irrigation
